

Gas Appliances

Gas Appliance Testing & Certification

LabTest Certification Inc., an independent Certification Body (CB) accredited by the Standards Council of Canada, is recognized to test and certify various product categories for safety, efficiency and Energy Star certification. LabTest provides gas appliance manufacturers with testing and certification services to comply with almost any gas product safety standard (CSA, CGA, UL, EN, IEC, ANSI, etc.), including Energy Efficiency Regulations set forth by Natural Resources Canada (NRCAN).

LC Mark Fully Accredited!

A great alternative to CSA & UL

Fast, cost-effective and painless

Get your product to market faster!

As your Partner in Testing and Certification, LabTest provides a single source for all your product testing & certification needs. Gas appliance products we test & certify for global markets include:

- Household and Commercial Appliances
- Hot water boilers & heaters
- Fireplaces
- Heating and Ventilation Products
- Heaters: air, mobile, patio, etc.
- Air conditioners
- Dehumidifiers
- Gas Generators
- Thermostats and other control devices
- Components including hoses & fittings
- Cylinder valve accessories

With our commitment to customer service and understanding of the national product safety standards, LabTest provides a quick, cost effective and painless route for all your product certifications. For organizations with global markets and/or multiple product categories, LabTest offers you a "One-Stop-Solution" for both domestic and international markets.
